

Blackhawk XR Fuel Lockers

Fuel capacity increase for the King Air 90 series

Blackhawk™
Worldwide Aircraft Performance Enhancements

Blackhawk's newly certified XR Fuel Lockers give the King Air 90 series a much needed boost in range. The option of adding over 80 gallons of fuel will extend your flight endurance by an impressive 20%. Borderline missions can now be flown with confidence while many one-stop routes become non-stop. Now you can save time and money while enjoying the flexibility of owning an "Xtra Range" King Air.

- 300 nautical mile extra range
- Lower block to block time
- Turn one-stops into non-stops
- Ability to "tanker" cheaper fuel
- Fewer cycles = fewer maintenance visits = lower operating costs

Proven Performance, Not Paper Promises

Blackhawk XR™ Fuel Lockers

Minneapolis (MSP) to Naples (APF) - 1257 nm
